**Adjusted OIBDA and Adjusted OIBDA Margin**

Adjusted Operating Income Before Depreciation and Amortization ("Adjusted OIBDA") and Adjusted OIBDA margin are not financial measures calculated in accordance with GAAP in the United States.

Adjusted OIBDA represents operating income before depreciation and amortization expense adjusted to also exclude non-cash share-based payment costs, impairment of long-lived assets, workforce reorganization costs, termination of the Regal ESA, system optimization costs, satellite transition costs, Spotlight acquisition and transition related costs and advisor fees related to involvement in the Cineworld proceeding and Chapter 11 case. Our management uses this non-GAAP financial measure to evaluate operating performance, to forecast future results and as a basis for compensation. The Company believes this is an important supplemental measure of operating performance because it eliminates items that have less bearing on its operating performance and highlight trends in its core business that may not otherwise be apparent when relying solely on GAAP financial measures. The Company believes the presentation of this measure is relevant and useful for investors because it enables them to view performance in a manner similar to the method used by the Company's management, helps improve their ability to understand the Company's operating performance and makes it easier to compare the Company's results with other companies that may have different depreciation and amortization policies, non-cash share-based payment costs, impairment of long-lived assets, workforce reorganization costs, termination costs, system optimization costs, satellite transition costs, acquisition and transition related costs and advisor fees.

Adjusted OIBDA margin is calculated by dividing Adjusted OIBDA by total revenue. Our management uses this non-GAAP financial measure to evaluate operating performance, to forecast future results and as a basis for compensation. The Company believes this is an important supplemental measure of operating performance because it eliminates items that have less bearing on its operating performance and highlight trends in its core business that may not otherwise be apparent when relying solely on GAAP financial measures. The Company believes the presentation of this measure is relevant and useful for investors because it enables them to view performance in a manner similar to the method used by the Company's management, helps improve their ability to understand the Company's operating performance and makes it easier to compare the Company's results with other companies that may have different depreciation and amortization policies, non-cash share-based payment costs, impairment of long-lived assets, workforce reorganization costs, termination costs, system optimization costs, satellite transition costs, acquisition and transition related costs and advisor fees.

A limitation of both of these measures, however, is that they exclude depreciation and amortization, which represent a proxy for the periodic costs of certain capitalized tangible and intangible assets used in generating revenues in NCM LLC's business. In addition, Adjusted OIBDA and Adjusted OIBDA margin have the limitation of not reflecting the effect of the Company's non-cash share-based payment costs, impairment of long-lived assets, workforce reorganization costs, termination of the Regal ESA, system optimization costs, satellite transition costs, acquisition and transition related costs, and advisor fees related to involvement in the Cineworld proceeding and Chapter 11 case. Adjusted OIBDA should not be regarded as an alternative to operating income, net income or as indicators of operating performance, nor should it be considered in isolation of, or as substitutes for financial measures prepared in accordance with GAAP. The Company believes that operating income is the most directly comparable GAAP financial measure to Adjusted OIBDA, and operating margin is the most directly comparable GAAP financial measure to Adjusted OIBDA margin. Because not all companies use identical calculations, these non-GAAP presentations may not be comparable to other similarly titled measures of other companies, or calculations in NCM LLC's debt agreement.

The Company has not provided a reconciliation of the forward-looking non-GAAP Adjusted OIBDA measure to forward-looking GAAP operating income due to the inability to predict the amount and timing of impacts outside of the Company's control on certain items, including the timing of revenue and charges reflected in our reconciliation of historic numbers, the amount of which, based on historical experience, could be significant and are difficult to reasonably predict. Accordingly, a reconciliation of this non-GAAP measure is not available without unreasonable effort.

The following table reconciles the Company's operating loss and operating margin to Adjusted OIBDA and Adjusted OIBDA margin for the periods presented (dollars in millions):

- (3) Workforce reorganization costs represent eliminated positions and redundancy costs associated with changes to the Company's workforce, as well as related office relocations.
- (4) The net impact of Regal's termination of the ESA resulting from the disposal of the intangible asset partially offset by the surrender of Regal's ownership in the Company and the forgiveness of the prepetition claims.

- (6) One-time costs of transitioning satellite providers during 2024.

#### Adjusted Net Income (loss) and Income (loss) per Share

Adjusted net income (loss) and income (loss) per share are not financial measures calculated in accordance with GAAP in the United States. Adjusted net income (loss) and income (loss) per share are calculated using reported net income (loss) and income (loss) per share and exclude workforce reorganization costs, system optimization costs, satellite transition costs, Spotlight acquisition and integration costs, advisor fees related to the Cineworld proceeding and Chapter 11 case and (gain) loss on re-measurement of the payable to ESA Parties under the tax receivable agreement. Our management use these non-GAAP financial measures as an additional tool to evaluate operating performance. The Company believes these are important supplemental measures of operating performance because they eliminate items that have less bearing on its operating performance and so highlight trends in its core business that may not otherwise be apparent when relying solely on GAAP financial measures. The Company believes the presentation of these measures is relevant and useful for investors because it enables them to view performance in a manner similar to a method used by the Company's management and helps improve their ability to understand the Company's operating performance. Adjusted net income (loss) and income (loss) per share should not be regarded as alternatives to net income (loss) and income (loss) per share or as indicators of operating performance, nor should they be considered in isolation of, or as substitutes for financial measures prepared in accordance with GAAP. The Company believes that net income (loss) and income (loss) per share are the most directly comparable GAAP financial measures. Because not all companies use identical calculations, these presentations may not be comparable to other similarly titled measures of other companies.

The following table reconciles as reported net income (loss) and income (loss) per share to adjusted net income (loss) and income (loss) per share excluding workforce reorganization costs, system optimization costs, satellite transition costs, Spotlight acquisition and integration costs, advisor fees related to the Cineworld proceeding and Chapter 11 case and (gain) loss on remeasurement of the payable to ESA Parties under the tax receivable agreement for the periods presented (dollars in millions):
